Summary

Data analytics engineer who builds **Azure Databricks** pipelines, **SQL Server** ETL, **Power BI** and **Tableau** reporting, and internal applications. Experience across a public utility, aviation, clinical research, and freight logistics. Turns messy operational data into tested pipelines, models, and tools that save teams **20–40 hours a week**.

Experience

Northern Kentucky Water District **Erlanger, KY**
Data Analytics Engineer (official title: Data Analytics Specialist) *02/2026 – Present*

- Built a central data warehouse on **Azure Databricks** that brings data from **12 source systems** (SQL Server databases and REST APIs) into clean, analysis-ready tables.
- Designed config-driven ingestion, so a new SQL Server source is added with a config file instead of new code.
- Model warehouse data as **fact and dimension tables** with change history, and write **SQL** views and stored procedures.
- Ship tested **Python** and **PySpark** code through **Azure DevOps CI/CD**, orchestrated with **Azure Data Factory**.
- Migrated **40–50 legacy Crystal Reports** to **Power BI** and built **10–20 dashboards** for seven departments, saving **20–40 staff hours per week**.
- Find and fix duplicates, missing records, and inconsistent fields across SAP and Lucity, and document each data process.
- Built **Claude agents, skills, and rules on Databricks**, and run employee surveys that feed HR dashboards.

Atlas Air Worldwide **Erlanger, KY**
Data Analysis and Process Solutions Intern *05/2025 – 12/2025*

- Planned and built an **FAA drug and alcohol testing randomizer** in **R Shiny** for all FAA-regulated employees, from requirements through deployment and training. It **met all FAA guidelines** and reduced reliance on a costly vendor.
- Stored app data, results, and audit logs in SharePoint via the **Microsoft Graph API** and Azure AD/OAuth.
- Built **Power Automate** workflows for pilot training schedules and crew and immigration reporting, contributing to about **25–30 staff hours saved weekly**.
- Added **usage tracking** to three internal apps in **Power BI**, and embedded a **Power App** for dispatchers.
- Contributed **Python** code and UI decisions to an enterprise analytics platform on **Palantir Foundry** built with BCG.

Northern Kentucky University, College of Informatics **Highland Heights, KY**
Teaching Assistant and Undergraduate Research Assistant *08/2025 – 12/2025*

- TA for Intro to Web Development (HTML, CSS, JavaScript, WordPress); assisted Dr. Zhou's research.

Kentucky Commercialization Ventures **Kentucky**
Innovation Fellow *08/2025 – 12/2025*

- Developed the **VIDVO** concept through customer discovery, SWOT analysis, failure-mode assessment, commercialization planning, and business recommendations.

Medpace **Cincinnati, OH**
Data Science Intern (Informatics Analyst Intern) *08/2024 – 12/2024*

- Cleaned, validated, and transformed **millions of clinical trial records** across studies with **SQL**, **Python**, and **R**.
- Built **dbt** and SQL transformations on **Snowflake** and **Power BI** reporting for analysts and leadership.
- Ran **ANOVA** and regression models in **SAS**, and built an **R Shiny** global study map for RFP work.
- Led monthly dashboard design sessions for **10+ analysts** in the US and UK.

Motus Freight **Bellevue, KY**
Data Analytics Intern *01/2024 – 08/2024*

- Built **Tableau** dashboards tied to the **Turvo** TMS and administered Tableau Cloud publishing and refreshes.
- Built a **CO2 emissions dashboard** with forecasting that contributed to a **12.4% emissions drop**.
- Built a regional dashboard across **4 regions and 49 states** that contributed to a **15% profitability increase**.
- Built customer **profitability scorecards** with P&L metrics and **IBM Cognos** reports.

Northern Kentucky University, University Housing **Highland Heights, KY**
Desk Assistant

- Handled check-in and check-out, access monitoring, equipment tracking, and resident communication.

Education

Northern Kentucky University **Highland Heights, KY**
B.S. Information Technology, Minor in Digital Design, GPA 3.9 *01/2022 – 12/2025*

- **Summa Cum Laude**; International Merit Scholarship; EDGE Award; President's and Dean's Honors Lists.

Projects

comply. (Compliance OS for DOT Testing) | *Independent Project / www.complydot.org* **07/2026 – Present**

- Building a compliance platform for employers running DOT drug and alcohol testing, starting with FAA Part 120.
- Built in **React 19**, **TypeScript**, and **Vite** with HR pool sync, seeded random selection, lab result matching, MIS reporting, and an audit trail; **28 Vitest unit tests**.

Nurse Workforce Sentiment Analysis | *Research with Dr. Zhou* **07/2025 – 12/2025**

- Built a **Python pipeline** that scraped and cleaned first-year nurse forum posts, then used **NLP** (NLTK, scikit-learn, Pandas) to classify stress, depression, workplace, and wellbeing themes.
- Built an interactive **R Shiny dashboard** of sentiment over time, common terms, and stress themes, supporting a planned conference paper on nurse mental health.

AI Chatbot for Northern Kentucky University | *Research with Dr. Zhou* **02/2024 – 08/2024**

- Built a **Python** scraper (with Jina) that collected NKU web pages, then cleaned them into **1,611 training samples** in instruction/input/output format.
- Fine-tuned a **1.5B-parameter GPT-2** model that beat ChatGPT by **10–15%** on 10 NKU-specific test questions.

Skills

Languages: SQL | T-SQL | Python | PySpark | R | DAX | Power Query (M) | SAS | PowerShell | JavaScript | TypeScript
Data Engineering: Azure Databricks | Delta Lake | Unity Catalog | Azure Data Factory | SQL Server (SSIS, SQL Agent) | Snowflake | dbt | BigQuery | ETL/ELT | Dimensional Modeling
BI & Apps: Power BI | Tableau | Crystal Reports | IBM Cognos | Power Apps | Power Automate | SharePoint | R Shiny
Practices: Git | Azure DevOps CI/CD | pytest | Vitest | Data Validation | Documentation | Statistics | NLP
Domains: Utilities | Aviation (FAA Part 120) | Clinical Research | Freight Logistics | SAP | Lucity | Medidata | Turvo
